

Network Administrator

Location: Curacao, Netherlands Antilles

Type of Employment: Full-Time Permanent

Job Summary

Install, setup, configure, and monitor all aspects of this company's local and wide area networks. Perform a variety of installation, maintenance, monitoring, and troubleshooting tasks in accordance with this company's policy to ensure network performance meets company and user requirements.

Primary Responsibilities

- Network administration (including backups, security management, user account management, e-mail systems, web servers, internet access, remote user access, office systems and applications support).
- Support server, network and desktop hardware, software and applications.
- Investigate user problems, identify their source, determine possible solutions, test and implement solutions.
- Troubleshoot networks, systems, and applications to identify and correct malfunctions and other operational difficulties.
- Assist in performing technology needs analysis.
- Roll out hardware and software to ensure optimal deployment of resources.
- Assist in Planning, implementing, and supporting the network and computing infrastructure plan.
- Manage small to medium sized projects according to agreed upon budgets and schedules.
- Assist with technology planning through ongoing research.
- Maintain confidentiality with regard to the information being processed, stored or accessed by the network.
- Other duties as assigned.

Skill and Ability to:

- Plan, design, and maintain data networks and servers.
- Provide technical support to users.
- Administer day-to-day operation of networks and servers.
- Communicate effectively in both oral and written form.
- Ability to learn new software and hardware packages.
- Adapt to changes in technology.
- Work independently and as a team member.
- Establish and maintain cooperative working relationship with all those contacted during the course of work.

Technical Skills:

- LAN/WAN Technologies
- Network and Internet protocols
- Cisco firewalls, switches, routers
- VPN / Remote access technologies
- Unix / FreeBSD
- Windows 2003 server
- IIS Web server

WORKING CONDITIONS

Working conditions are normal for an office environment. Work requires extensive work using a computer. Responsibilities will require rotational, scheduled evening and weekend work.

COMPENSATION
